FT1DR and FTM-400DR Software Update Information

Refer to the software update procedure instructions in the help files (.chm files) inside the ZIP holders.

FTM-400DR Main Version 1.10 and DSP Version 0202

- Corrects the additional digit that was shown on the numeric display, similar to 80095 ft etc...
- Provides display of the received DR-1 digital repeater C4FM ID on the FTM-400DR touch panel screen
- DSP v0202 firmware **MUST** also be installed after the MAIN v1.10 firmware update

Note: If you already have Main **V1.10** and DSP **V0202** software versions, it is not necessary to update the FTM400DR again.

FT1DR Version 1.08

- Provides display of the received DR-1 digital repeater C4FM ID on the FT1DR screen (Update is only needed when used with a DR-1 repeater and System Fusion)

Note: If you already have Main **V1.08** software versions, it is not necessary to update the FT1DR again.

We hope this new software will increase your enjoyment of your FTM-400DR or FT1DR. Thank you for choosing Yaesu radios. If you have any problems or questions please contact Yaesu Amateur Tech Support amateurtech@yaesu.com.
