FT5DR/FT5DE Firmware Update Information

Refer to the Firmware Update Instruction Manual in each ZIP file.

The latest versions are listed below with the release date.
▪ MAIN Firmware Version **1.11** (3/29/22)

Currently we have two different destination versions of the FT5DR/FT5DE: USA (DST: USA/AUS), EXP (DST: EU/EXP/CHN).

*The firmware version for Japan is different from USA/AUS, EXP versions. Please check the latest firmware of the Japanese version on the Japan WEB site:
http://www.yaesu.com/jp/amateur_index/product/ft5d/firmware.html

Please open the Update Instruction Manual FT5DR/DE MAIN/SUB Update Instruction Manual (2111-A) and review the information before starting the update firmware.

CAUTION:
Please be sure to confirm the model and the version of your transceiver before starting the update. Writing incorrect firmware to the transceiver may cause abnormal operation or failure.

FT5DR/FT5DE MAIN Ver. 1.11

- Fixed a bug that the frequency display rarely blinks.
- After turning the power OFF during PMG operation, the power turns ON in WIRES-X PDN (Portable Digital Node) mode.
- Fixed a bug that PDN mode rarely starts normally when it is turned ON.
- Other functions have been improved and optimized.

If you already have Main v1.11 firmware versions, it is not necessary to update the FT5DR/FT5DE again.

We hope this new firmware will increase your enjoyment of the FT5DR/FT5DE. Thank you for choosing Yaesu radios. If you have any problems or questions, please contact Yaesu Amateur Tech Support amateurtech@yaesu.com.
