### WiRES-X PC Software ver.1.530 Update Information

Software version

**WiRES-X (PC software)** ver. V1.510 → V1.530

Update contents:

1. C4FM digital transceiver FT3D incorporates the Portable Digital Node function.
2. In “Chat function” you can chat in text with the owner of the connected node or room using the node station PC. When the Chat screen contains a URL, clicking the URL opens the page.
3. In the radio setting screen, changing the setting does not disclose the operating frequency of the initial value. The frequency is not displayed on the active ID list when the radio setting is not necessary for direct operation.
4. Other improvements and optimizations were made.

If you already have Ver. 1.530 software, it is not necessary to update again.

We hope this new software will increase your enjoyment of the WiRES-X. Thank you for choosing Yaesu radios. If you have any problems or questions please contact Yaesu Amateur Tech Support [amateurtech@yaesu.com](mailto:amateurtech@yaesu.com).
