*The firmware versions for Japan and CHN are different from USA or EXP versions. Please check the latest firmware of the Japanese version on the Japan WEB site:

You must check the destination version of the radio you have and use the correct update firmware. The destination is marked on the box serial number label. If the box is not available, the country you purchased the radio in may indicate the destination. If the FCC part 15 rules statement is on the radio above the Serial/ID label, it is the USA version. Other versions will not have the FCC label.
